# Moderna COVID-19 Vaccine

The Moderna COVID-19 vaccine is used to prevent COVID-19. Over the next several weeks, Moderna vaccine clinics will be set up in communities through out the region.

While the vaccine is voluntary, it is an important opportunity to protect oneself from COVID-19.

Adults 65 years of age and older  
Adults in Indigenous communities (18 years of age and older)

Health care workers who have direct contact with patients, including those who work in health care settings and personal support workers.

Residents and staff of shared living settings that provide care for seniors

## The mass vaccination clinics are tentatively scheduled on:

Peawanuck: January 26, 2021

Kashechewan: February 1, 2021

Attawapiskat: February 8, 2021

Fort Albany: February 15, 2021

Moosonee: March 1, 2021

Moose Factory: March 1, 2021

If you have questions or symptoms such as fever, cough or difficulty breathing, call your local public health office or WAHA.

### To reduce the risk of exposure, please continue to follow public health measures:

Practice 2m physical distancing

Wear a mask

Wash your hands often with soap and water or alcohol-based hand sanitizer

Avoid touching your eyes, nose or mouth

Get tested for COVID-19

Stay home and isolate for 14 days if you have any symptoms

Sneeze and cough into your sleeve

Stay informed. Follow credible sources

For more information visit [www.waha.ca](http://www.waha.ca) or WAHA's Facebook page or the Porcupine Health Unit's website.
